

Things to fix:

- Detail & Features: Detail & Features
- Add search bar in the neighborhoods list (so we can type and select instead into looking at the entire list)
- Change name “Status of the properties” for: Sales Conditions. Basically in the website this option is 2 times. We can leave one as Status of the properties and other one as sales conditions.
- View : steet_view (delete underscore)
- Gated Communities: change for “Highlights” instead because there are some options related to the apartment itself.
- Please show Housing type as it is and not as Property type.
- Remember to put decimals (points or comas) on the house prices. Example:
1.350.000 NAF
- If something is buyers cost, is also K.K. K.K. is the literal translation of buyers cost. In the english version, you should only have the buyers cost option, and that is automaticall translated to dutch.
- To “Price Type” add: “Prices Starting at”
- To other rooms add “Office space”
- Remember to put the other rooms as multiple selection, as well as view.
